Artifact Walkthrough Questions
Anas\assia Drofa | Peter Jones | Ben Koh | Rachel Shipman | Ray Su

idea creation and documentation:

When and where did the idea occur to you?
How did you document the idea?
When you add the idea to the notebook, where do you add it?
How long after the idea occurred to you did you decide to document it?
How did you decide to collaborate with someone on this project?
After recording the idea, when did you add to the documentation?
Did you have someone witness this idea when you documented it?
Did the witness read your document?
Did you verbally explain your idea to the witness?
From where did you gather the information you are showing us today?
Did you and your collaborator share a lab notebook?
On how many projects are you collaborating with others?
How is documentation created by different collaborators linked?

tools:

if not in the notebook:
Why did you choose not to record the idea in the notebook?
What other tools did you use to record this idea?
How do you have someone witness the idea?

if in the notebook:
Did you use any other tools to document the idea?
At the time you had this idea, were you using more than one notebook?
What do you like most about the notebook?
What do you dislike most about the notebook?
Do you write down anything unrelated to an invention in the notebook?
Do you take the notebook out of the office?
Are you worried about other people reading the notebook?

pet question:

Would you classify your use of the lab notebook as typical or atypical in relation to other research scientists at MEDRAD?
How much do you know about what happens after you submit the idea to IP legal? How much do you know about the patenting process?
